

# Filipi N. Silva

Researcher • Data scientist • Software developer

Ph.D. in Computational Physics

Research Scientist at Indiana University Network Science Institute

## Hi!

I'm Filipi Nascimento Silva, Ph.D. in computational physics, currently working as a research scientist at the Indiana University Network Science Institute (IUNI).

## Research

My interests include developing and implementing new techniques for analyzing, modeling and understanding real-world systems through [complex networks](#), machine learning and data visualization.

## Experience

I've published papers and developed software on many scientific fields, including [bioinformatics](#), [text analysis](#), [scientometry](#), [information science](#), and [urban networks](#). I'm also the creator of the [Networks 3D](#) and [Helios-Web](#) visualization tools.

## Future

I'm looking for opportunities around the world to continue to develop my skills and share my experience while performing research on interdisciplinary topics or bringing amazing products to life. I'm interesting in careers at the university, industry, or a combination of both.

# Specs.

# Experience

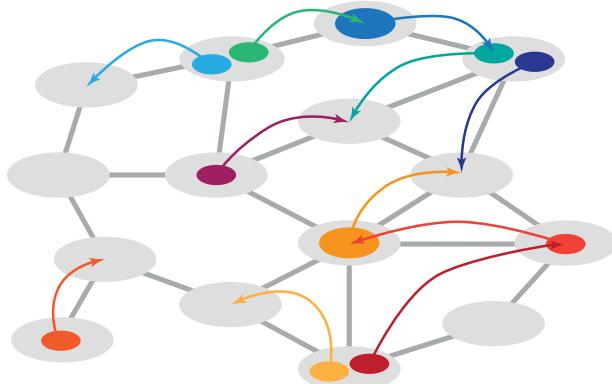

---

## Research Scientist

IUNI - Indiana University (IU)  
2019 - now

Currently studying the dynamics of science by tracking how scientific fields evolve over time.  
Also working on other projects related to building networks from similarity data, such as networks of politicians connected by vote correlation. Also developing a new set of interactive web-based network visualization tools for researchers named Helios-Web.

## Postdoctoral Fellow

IFSC1 - University of São Paulo (USP)  
2015 - 2018

Studied dynamics occurring or driving the evolution of *complex networks* along time for a diverse range of datasets, such as texts, cities, financial market and biological systems. Also developing new web-based tools and *libraries* for *network analysis* and *visualization*, as well as new *theoretical approaches* in complex networks. Was mentor of student G. S. Domingues for the scientific initiation project: *Topological characterization of world cities*, which resulted in one publication.  
Advisor: Luciano da F. Costa  
(grants by FAPESP)

# Experience (cont)

## Visiting Researcher

SICE<sup>1</sup> - Indiana University  
2017 - 2018

Currently studying the evolution of scientific fields along time based on information coming from content (such as texts), citation networks and popularity metrics. Our main goal is to predict the emergence of new scientific fields and understand its dynamics. For that, we developed a web application to explore popularity time-series obtained for scientific fields and properties from citation networks.

Supervision: Filippo Menczer  
(grants by FAPESP)

## iOS and Web Developer

Freelancer  
2009-2010 and 2019

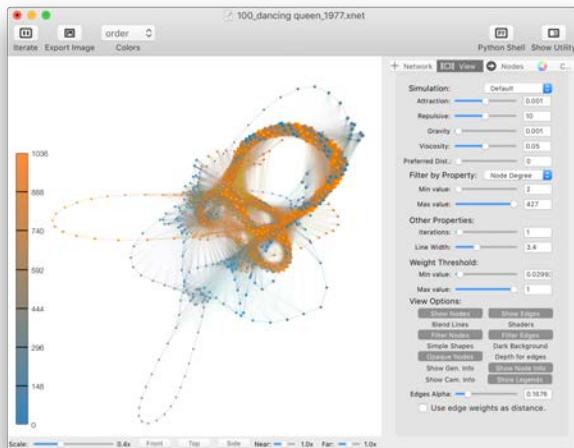

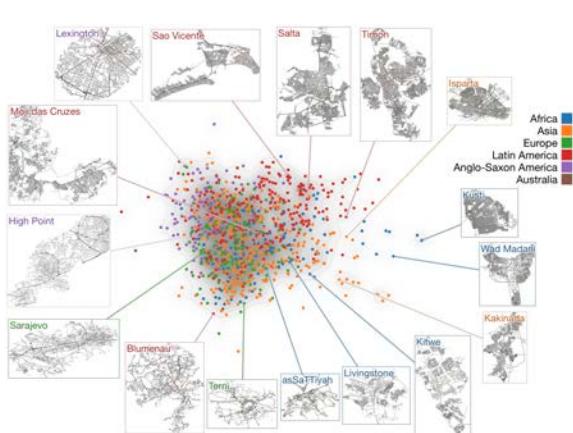

Acting as freelancer consultant developer of solutions for *iOS*. Started developing an *entertainment* and *visualization library* for *iOS* devices written in *Objective-C* and using *OpenGL ES*. Currently developing an *iOS* game called *Gridland*. Notable clients: Paperless<sup>2</sup>, Gtechnologies, Plus-TI, and Rádio Eldorado<sup>3</sup>.

1 - School of Informatics, Computing and Engineering

2 - [www.paperlessdobrasil.com.br](http://www.paperlessdobrasil.com.br)

3 - [www.facebook.com/radioeldorado/](https://www.facebook.com/radioeldorado/)

# Experience (cont)

## Data Scientist

Freelancer for Bike da Firma  
2015

Worked as a freelancer consultant and developer of *data science* solutions for Bike da Firma<sup>1</sup>. Conceived and implemented *classification techniques* employed to *extract patterns* of information retrieved from mobile devices, such as *geolocation* and *accelerometer data*.

## Ph.D. Thesis

IFSC - University of São Paulo (USP)  
2011 - 2015

Studied the *multidimensional structure* of *complex networks* such as *fractals* and *high dimensional geographic networks*. We analyzed many real-world systems, such as gene to gene correlation networks, academic publication data and geographic networks. During this time I also improved and optimized the algorithms behind our network visualization tool leading to a visualizer tool for the web.

Advisor: Luciano da F. Costa  
(grants by FAPESP)

**Among the three awarded theses in exact sciences of USP in 2015/2016.<sup>2</sup>**

1 - [www.bikedafirma.com/en/](http://www.bikedafirma.com/en/)

2 - <https://jornal.usp.br/universidade/usp-anuncia-vencedores-do-premio-tese-destaque-2017/>

## **Experience** (cont)

---

**Scientific initiation** Studied the multiscale structure of complex network derived from complex systems by means of IFSC - USP hierarchical node-centered measurements.

2007 - 2009 Developed a framework to obtain Hierarchical (Concentric) properties from complex networks and published an article in Journal of Statistical Physics.  
Supervision: Luciano da Fontoura Costa.  
Advisor: Luciano da F. Costa  
(grants by CAPES)

**Scientific initiation** Ported RoundMidnight - EXAFS Datafiting software from Mac OS X to Windows.

IFSC - USP Advisors: Valmor R. Mastelaro and Alain Michalowicz  
2004 - 2005 (grants by CNPq)

## Misc. experience

---

TEACHING Organized and conducted the IUNI Workshop on "An  
EXPERIENCE Introduction to Network Visualization" 2022

<https://iuni.iu.edu/news/event/79>

Organized and conducted the CADRE Workshop for  
the ISSI 2021

[https://cadre.iu.edu/news-and-events/events/  
networks-2021-cadre-workshop-satellite-2](https://cadre.iu.edu/news-and-events/events/networks-2021-cadre-workshop-satellite-2)

Assistant lecturer internship (Programa PAE) - 2014

Grants by CAPES / IFSC - University of São Paulo

Course: Mathematical and Computational Modeling

Duration: 120 hours Supervision: Prof. L. da F. Costa

Conducted the workshop: Introduction to Interactive  
Visualization of Data and Complex Networks

5<sup>a</sup> Semana da Física / IFSC - University of São Paulo

MENTORSHIP AND Google Summer of Code 2021 and 2022

SUPERVISING Mentor of Bruno Messias (2021) and Mohamed  
EXPERIENCE Agour (2022) for the FURY/Helios project (under the  
Python Software Foundation)

## Software (cont)

---

### Helios

2020 - now

Currently, no flexible and fast tool implementing both graph layout and network rendering is available for researchers to explore and visualize large networks. The purpose of this project is to fill this gap by developing an advanced interactive visualization tool for networks based on the concepts employed on my previous works.

The project was separated into three main components: Helios Core, Helios Fury, and Helios Web.

Helios Core will implement a set of fast and scalable layout techniques for network visualization using the C language. This includes force-directed methods and node embedding techniques. The core will serve as the basis to build the other components and will be available as a Python package or compilable to WebAssembly.

Helios Fury is a version of the rendering engine being written on top of the Fury<sup>1</sup> framework for Python.

Example visualizations:

<https://tinyurl.com/netvizplaylist>

A preliminary versions of Helios are available at:

<http://github.com/filipinascimento/helios-web> (helios-web)  
<https://heliosnetwork.io> (helios-core)

### Network neuroscience apps for brainlife

2020 - 2021

While network neuroscience has become popular among researchers over the past few years, the brainlife platform lacks network analysis pipelines. This subproject aims to make available network analysis and visualization tools on the brainlife framework.

Five brainlife apps were developed and can be found in:

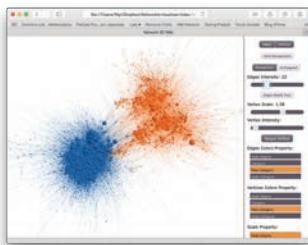

<https://brainlife.io/apps#network>

1 - <https://fury.gl>

## Software (cont)

---

### Network visualization tools for the web 2013 - 2019

To improve the usefulness of our visualization tools we started porting them to a new web-based environment. More specifically, we are reimplementing the visualizer using web technologies, such as WebGL and HTML5. Currently it can display graphically astounding complex networks visualizations on any recent major browser.

Interdisciplinary map of science obtained from a journals network (video).

<http://youtu.be/ipjTMy-RnvU>

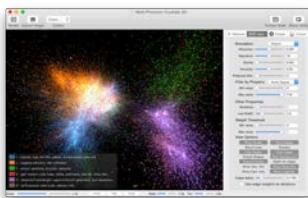

Gene expression map for people suffering from febrile epilepsy (video).

<http://youtu.be/Trb67DoLf5U>

The software source code and demonstration can be found in:

<https://filipinascimento.github.io/software/networksweb/>

### Networks 3D 2009 - 2019

Networks 3D is a software under development, built to construct and interact with graphically appealing visualizations of large complex networks. Its main objective is to provide means for researchers and specialists to see and get a visual overview of the data they are working with. The tool is based on a optimized force-directed algorithm, which is used to project the networks to a 2D or 3D space, presenting results generated by the graphical processing unit in real-time.

More info at the software webpage:

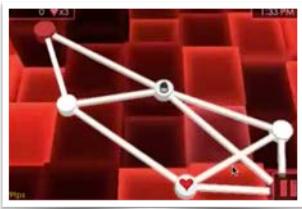

<https://filipinascimento.github.io/networks3d/>

## Other projects

---

### Gridland

2011 - 2015

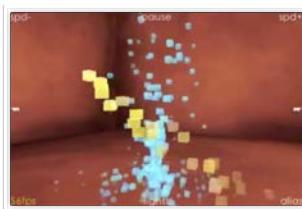

Gridland is a game being developed by me and a friend, to be distributed initially on the App Store. It is a implementation of the famous Shannon switching machine where two players compete by securing or destroying links in a graph. We developed all aspects of the game, including the artificial intelligence with 3 levels of difficulty and a 3D graphical interface. It was written entirely in C and Objective-C.

See a video of an early state version in:

<http://youtu.be/-ivf89Oh0VU>

### HighSpace

2010 - 2011

We developed a 3D scene engine on top of the Cocoa Touch frameworks and OpenGL ES. The capabilities of the engine include animated GUIs, 3D object loader, geometry representation, 3D particles engine, fast text rendering, dynamic texture atlas, keyframe animations, camera control, fast sprite rendering, etc.

Some features of the engine are shown in this video playlist:

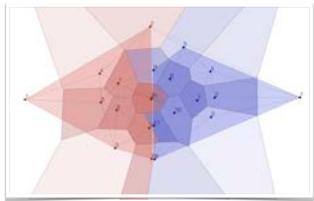

<http://www.youtube.com/playlist?list=PLFimqafBV-l5JvdrkczdCf73SKpBVN5fF>

or <http://goo.gl/8Rmt4>

## Other projects (cont)

---

**Other assignments** Developed interactive visualizations of soccer games for data from Prof. Ricardo M. L. de Barros (UNICAMP)

<http://cyvision.ifsc.usp.br/futebolTests/voronoi40000.html>  
(the download of the data may take several minutes)  
(currently disabled)

Also developed software to obtain network metrics:  
<https://github.com/filipinascimento/CVAccessibility>  
<https://github.com/filipinascimento/CVSymmetry>

Developed the facebook apps for two major radio stations of São Paulo/Brasil (Rádio Eldorado and Rádio Estadão)

Created the website for the Cybernetic Vision Research Group (2012).  
<http://cyvision.ifsc.usp.br/>  
(currently disabled)

Developed a software to obtain concentric measurements of complex networks (2008).  
<http://cyvision.ifsc.usp.br/concentric/>  
(currently disabled)

## Skill set summary

---

- Can read and write software in many programming languages such as: C, C++, Java, Objective-C, Python and Javascript. In particular, modern C language programming (C99 and C11) is my speciality. I also have some experience with the development of frameworks and libraries (see HighSpace and CVAccessibility/CVSymmetry and Helios-Web). I'm also very flexible in learning and working with another programming language.
- Experience with code analysis and debugging. Including user-level knowledge of memory management techniques, such as checking for leaks, advanced allocations and deallocation patterns, reference counting, garbage collector, retain/release cycles. Also have some experience with code profiling and optimization based on time or memory.
- Can work with parallel and distributed computing on multiple machines or CPUs, encompassing libraries such as OpenMP and OpenMPI. Also have notions of MapReduce approach and GPU-based programming. (See CVAccessibility/CVSymmetry software).
- Some knowledge of GUI development and advanced knowledge of computer graphics. (see Gridland and Networks 3D). This includes shaders and advanced rendering techniques such as impostor spheres and SDF.
- Experienced with machine learning methods, including supervised and unsupervised embedding and classification techniques, such as PCA, LDA, K<sub>nn</sub>, SVM. I also have some experience using \*2vec approaches to find good embeddings for data. (See papers "A pattern recognition approach to complex networks" and "Concentric network symmetry grasps authors' styles in word adjacency networks").
- Scientific Background:
  - General and advanced physics knowledge.
  - Advanced computational 3D geometry skills.
  - Advanced data analysis and statistics knowledge.
  - Can develop projects and content in a team of researchers.
  - Great skills and innovative mind to tackle new problems.

## Skill set summary (cont)

---

- Experience with **natural language processing**. This includes techniques to pre-process textual data, such as **lemmatization**, **tokenization**, **tf-idf** and **embedding**. Also have experience with the proper analysis of text, including **topic modeling**, **semantic similarity** and **feature extraction**. (See papers "Concentric network symmetry grasps authors' styles in word adjacency networks", "Mesoscopic representation of texts as complex networks" and "Using network science and text analytics to produce surveys in a scientific topic").
- Advanced knowledge of **network science** and in representing **arbitrary datasets** as **complex networks**. (See experience and education sections).
- Skills to construct interactive **complex visualizations** of **arbitrary data**. (See soccer games visualization, network visualization tools in **WebGL** and my research papers).
- Experience with the following **tools and software**:
  - **iOS SDK**.
  - Cocoa/CocoaTouch and Objective-C libraries, including UIKit and AppKit.
  - OpenGL 2.x, OpenGL ES 1.x/2.0 and OpenGL 3.2
  - Xcode.
  - LLVM/Clang compiler, and GCC compiler.
  - Grand Central Dispatch, multi-threaded programming and blocks.
- **Web developer** with some experience in core technologies, such as, HTML5, CSS3, XML, JSON, WebGL, PHP, d3.js, Node.js and MongoDB. Nodejs npm package environment and deployment of ES6 web apps via snowpack and webpack.
- Remote versioning systems, such as **GIT**.

### **Opinion diversity and social bubbles in adaptive Sznajd networks**

Alexandre Benatti, Henrique F de Arruda, Filipi Nascimento Silva, Cesar Henrique Comin, Luciano da Fontoura Costa

Journal of Statistical Mechanics: Theory and Experiment, v. 2020, n. 2, p. 023407, 2020  
<https://arxiv.org/abs/1905.00867>

DOI: [10.1088/1742-5468/ab6de3](https://doi.org/10.1088/1742-5468/ab6de3)

### **Recency predicts bursts in the evolution of author citations**

Filipi Nascimento Silva, Aditya Tandon, Diego Raphael Amancio, Alessandro Flammini, Filippo Menczer, Staša Milojević, Santo Fortunato

arXiv preprint arXiv:1911.11926, 2019

<https://arxiv.org/abs/1911.11926>

### **Malleability of complex networks**

Filipi N Silva, Cesar H Comin, Luciano da F Costa

Journal of Statistical Mechanics: Theory and Experiment, v. 2019, n. 8, p. 083203, 2019

<https://arxiv.org/abs/1810.09602>

DOI: [10.1088/1742-5468/ab2ad1](https://doi.org/10.1088/1742-5468/ab2ad1)

### **Contrarian effects and echo chamber formation in opinion dynamics**

Henrique Ferraz de Arruda, Alexandre Benatti, Filipi Nascimento Silva, Cesar Henrique Comin, Luciano da Fontoura Costa

arXiv preprint arXiv:1910.06487, 2019

<https://arxiv.org/abs/1910.06487>

### **Connecting Network Science and Information Theory**

H. F. de Arruda, F. N. Silva, C. H. Comin, D. R. Amancio, L. da F. Costa

Physica A: Statistical Mechanics and its Applications, v. 515, n. 1, p. 641–648, 2019

<https://arxiv.org/abs/1704.03091>

DOI: [10.1016/j.physa.2018.10.005](https://doi.org/10.1016/j.physa.2018.10.005)

### **Dynamic Gene Network Analysis of Caco-2 Cell Response to Shiga Toxin-Producing Escherichia coli-Associated Hemolytic-Uremic Syndrome**

Silvia Y Bando, Priscila Iamashita, Filipi N Silva, Luciano da F Costa, Cecilia M Abe, Fernanda B Bertonha, Beatriz EC Guth, André Fujita, Carlos A Moreira-Filho

Microorganisms, v. 7, n. 7, p. 195, 2019

<https://pubmed.ncbi.nlm.nih.gov/31288487/>

DOI: [10.3390/microorganisms7070195](https://doi.org/10.3390/microorganisms7070195)
